Introduction to Software Engineering

Working Software

The student team is required to complete the **Working Software** documentation for the assigned course project, following the attached template.

Software Engineering Department
Faculty of Information and Technology
University of Science

Automated Testing and Working Software

Objectives

This document focus on the following topics:

- ✔ Completing the Automated Testing & Working Software document with the following sections:
  - Automated Testing
  - Working Software

1 Member Contribution Assessment

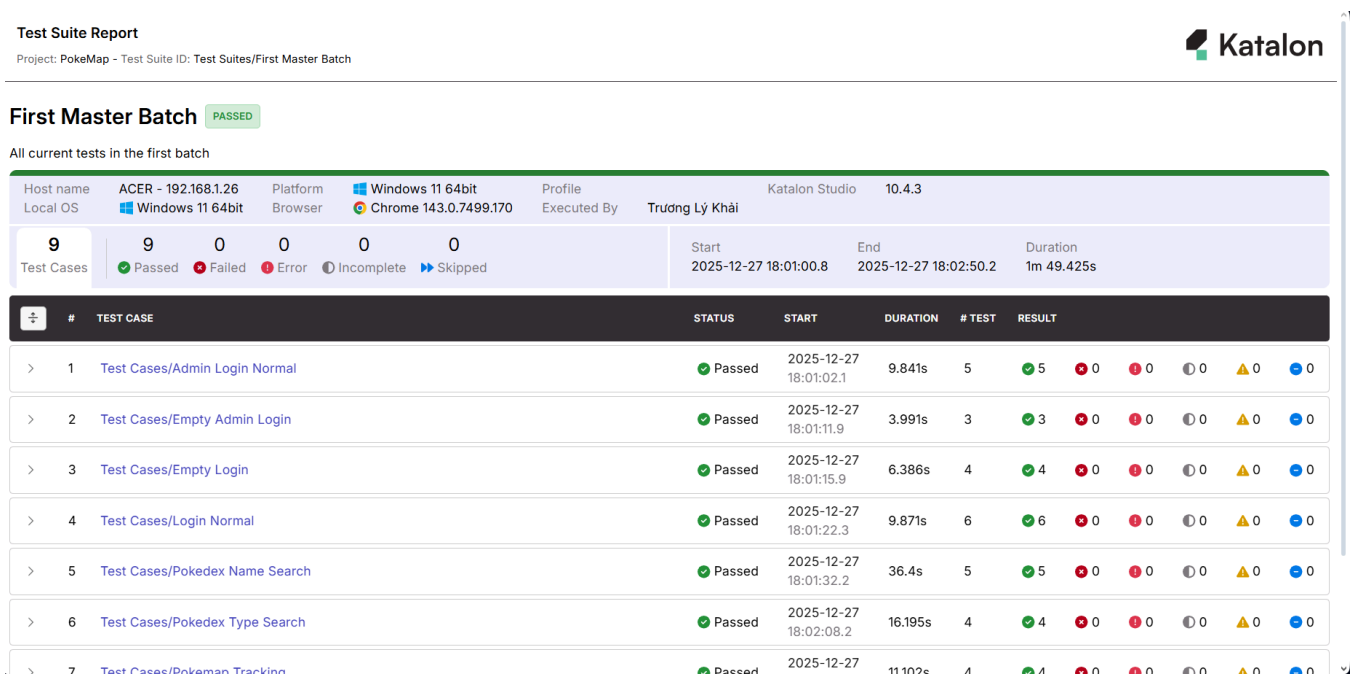
ID	Name	Role	Contribution (%)	Signature
23127061	Trương Lý Khải	**Project Manager** Business Analyst Tester	100%	
23127207	Đặng Đăng Khoa	Designer Backend Developer	100%	
23127271	Võ Ngọc Bích Trâm	Designer Frontend Developer Tester	100%	
23127404	Lê Tuấn Lộc	Fullstack Developer & Engineer	100%	
23127486	Phan Quốc Thịnh	Designer Frontend Developer	100%	

2 Automated Testing

Since our software is a website application, the testing software of choice is Katalon. We ran 9 different test cases related to 4 use cases. Along with this report are 3 different files documenting the results of the automated testing:

- **First Batch Report (.pdf):** Fully detailed report of the testing process including test case name, test scripts, and test result of each test case.
- **First Batch Details (.html):** An much more organized and compact interactive html file containing the same details as the First Batch Report.
- **Categorized First Batch Details (.html):** Same as First Batch Details, but categorized by use cases with no test scripts.

Here is an example screenshot of the **First Batch Details**:



Test Suite Report

Project: PokeMap - Test Suite ID: Test Suites/First Master Batch

Katalon

First Master Batch PASSED

All current tests in the first batch

Host name	ACER - 192.168.1.26	Platform	Windows 11 64bit	Profile		Katalon Studio	10.4.3
Local OS	Windows 11 64bit	Browser	Chrome 143.0.7499.170	Executed By	Trương Lý Khải		

9	9	0	0	0	0	Start	End	Duration

#	TEST CASE	STATUS	START	DURATION	# TEST	RESULT					
1	Test Cases/Admin Login Normal	Passed	2025-12-27 18:01:02.1	9.841s	5	5	0	0	0	0	0
2	Test Cases/Empty Admin Login	Passed	2025-12-27 18:01:11.9	3.991s	3	3	0	0	0	0	0
3	Test Cases/Empty Login	Passed	2025-12-27 18:01:15.9	6.386s	4	4	0	0	0	0	0
4	Test Cases/Login Normal	Passed	2025-12-27 18:01:22.3	9.871s	6	6	0	0	0	0	0
5	Test Cases/Pokedex Name Search	Passed	2025-12-27 18:01:32.2	36.4s	5	5	0	0	0	0	0
6	Test Cases/Pokedex Type Search	Passed	2025-12-27 18:02:08.2	16.195s	4	4	0	0	0	0	0
7	Test Cases/Pokemon Tracking	Passed	2025-12-27	11.102s	4	4	0	0	0	0	0

3 Working Software

A full demo of the software can be found using the following URL hosted on a Google Drive: Demo Video - PokeMap

The demo spans for roughly 13 minutes going over our proposed use cases. The demo also features lofi music.

4 Project Presentation

Similar to the Automated Testing Section, a copy of the slides used for presentation will be given along with this report. The presentations are correctly divided into 6 important sections:

- Problem statement, product position statement,users/market.
- Project management: team structure and responsibilities of team members.
- Software requirements: use-case model, non-functional requirements.
- Analysis and design: architecture and technologies used.
- Software testing: test environments, test plan, test results, and automated testing.
- Demo: key scenarios of the software.

The main presentation is hosted here.
